International Payroll Solutions

PwC has dedicated in-house payroll specialists operating in 114 countries around the globe.

Our approach

PwC's approach to managing and delivering multi territory payroll solutions is to bring together local client relationship teams, our global payroll management and co-ordination capability, in-country and in-house payroll teams and our preferred collaboration tool, Microsoft Sharepoint.

Why work with PwC?

- A provider with wide geographical coverage, delivering a controllable, scalable and cost effective solution. This allows you to reduce the number of providers and minimise HR and Finance involvement in payroll operations.
- An outsource provider experienced in dealing with Finance and HR functions going through change who can provide advice and assistance in developing enhancements and optimising the new operating model.
- Access to world class professionals across your operations in multiple locations, so that you receive a high quality, consistent and reliable service.
- Respect for your needs, including data security, and a spirit of cooperation to ensure the right controls are in place to address those needs.
