Topic

Unilever is one of the world's leading suppliers of fast-moving consumer goods. Every day, around the world, people reach for Unilever products. Our brands are trusted everywhere and, by listening to the people who buy them, we've grown into one of the world's most successful consumer goods companies. In fact, 150 million times a day, someone somewhere chooses a Unilever product.

Unilever has created an Enterprise Technology and Solutions (ETS) organisation which supports Finance, IT, HR, Real Estate, Facilities Management and Information & Analytics. Over the past 4 years, ETS has grown in scope and services whilst delivering demonstrable value to the business. Unilever has adopted digital innovation in bringing scalability, efficiency and growth opportunities to their operations.

Gary and Jaimie will share Unilever's journey in building the ETS organisation, focusing on the delivery of scope, service quality and efficiency. Together they will talk through their experiences in a 'panel interview' format to allow open discussions and interaction. This is great opportunity for anyone thinking of embarking on a journey or those who have already started, to learn from Gary and Jamie.

During the session, Gary and Jaimie will address the following topics:

- Background, history and journey for ETS
- Building capabilities – career paths/succession planning
- Challenges faced and what was done to overcome them
- Realising benefits
- Lessons learnt
