

Good practices in sustainability reporting

Tip #8: Value chain

Private sector

BT, Better Future Report 2014-15, p14 & 31

Supply chain and responsible procurement

We encourage our suppliers to adopt more responsible business practices and are guided by the 10 principles of the UN Global Compact as a member of the initiative. This helps us address social and environmental risks and governance challenges, and deliver business benefits. Wood, including wood-based fibre, is Mondi's most important natural resource. Ensuring that our forestry practices are sustainable, from the management of our own forests to the procurement of our wood and fibre throughout the supply chain is a business imperative. Certification also currently provides the best proof of sustainable forestry practices and provides credible support to our due diligence systems in terms of the European Union Timber Regulation (EUTR) and the US Lacey Act's legal requirements.

Discover how we're...

Promoting sustainable forest management through credible certification to ensure a secure source of sustainable fibre now and in the future

Implementing due diligence systems to meet the requirements of EUTR regulations and developing appropriate training material

Working to make certification systems more relevant and practical for the range of different forest types, and the scale and ownership of operations

Encouraging debate on key topics, including the principle of cascading use of wood

Woodyard, Mondi Štáhl, Czech Republic
