PwC viewpoint /case studies

What is changing in real estate?

Many companies are re-thinking the role of their real estate with the intention of:

- redesigning and refreshing the space they need to occupy to meet changing needs;
- divesting of surplus space and leveraging more value from retained space to release savings; and
- introducing more flexibility to the portfolio to cope with future change.

The key is to understand and define the purpose of real estate including: brand, customer needs, business strategy and employee requirements.

Post COVID-19 most employees want flexibility in a hybrid workplace but this needs to be within the parameters of what the business needs in order to meet customer needs.

In the short term there is a window of opportunity to change.

The office of the future will need space typologies for different activities like those below and should be of "evergreen" design or be in "permanent beta"

Collaboration

Create

Communication

Coaching

Community

Diversity, inclusion, wellbeing and environmental sustainability should be part of the design of a new office space

PwC

The future of the office?

We see that most organisations are defining their virtual work strategies post-COVID with a location-based model. However, we believe the next frontier is personalising how individuals and teams "consume" work using real-time tools which leverage advanced insights from human sciences.

How can real estate support this in a more distributed world?

2000-2009

2010-2019

2020-2021

2021+

2023+

Wellness Age

Focus on well-being and work-life balance initiatives. Beginning acceptance of working from home for set days.

Digital Age

Focus on creativity and collaboration to drive digital innovation.

Coworking and hoteling become the norm.

Virtual Age

Focus on COVID return to work approaches and defining permanent future work virtual / flexible / remote model.

Personalised Age

Work empowers the individual employee to satisfy their preferences to "consume" work where and how they perform at their best.

Intelligent Age

Work empowers individual, team and organisational performance through real-time scientific intelligent analytics.

Companies should be focusing here now

Case studies - FM & Real Estate

Insurance Company

Background

We developed a UK wide portfolio strategy to support the client's transformation programme and return to work after Covid-19. Key requirement of the project was to assess the future operating model which predicted working remotely at scale. The project involved quantifying the future space requirement based on workstyle analysis of the workforce, developing estate scenarios and considering exit options for onerous lease agreements, with due consideration of IFRS16, balance sheet, income statement and tax implications.

How we supported the client

We worked closely with key client stakeholder across the organization and supported the development and implementation of a vision for the future property portfolio. We worked collaboratively with the client teams to define the future vision of the office, identify space requirements and obtained buy-in from senior stakeholders. We conducted extensive workforce analysis in order to understand the future space requirements and agreed with the client the adoption of real estate targets to be reflected in the future state. A number of property scenarios were identified and two possible solutions were put forward to the board for consideration. The team developed a holistic and actionable portfolio strategy that was approved the Board for implementation.

Outcome

The Board approved the strategy and agreed to progress with the implementation and we are currently project managing the delivery of the strategy and progressing negotiations with the existing landlords.

PwC Everyday flexibility

Ten years ago PwC recognised a need to update its inefficient offices to accommodate the future business environment.

We implemented an office transformation programme to provide our staff with cutting-edge space. Our offices have been redesigned and improved to support our mobility and flexibility initiatives, while reducing our real estate and carbon footprint.

We took a data-driven approach. The analysis included location and scenario analysis on: expenses, network access, home working days, phone usage, barrier controls, working times, meeting room utilisation, client visits, travel to work, living costs per employee, millennial requirements, relative staff satisfaction scores, different office layouts, space standards, staff salaries and costs vs profit per employee.

Outcome

Office footprint has decreased by c30% (lease event triggers)

Headcount has risen by 24%

Workspace density (sharing ratio) – increased from 1.04 to 1.53 (+47%)

Target 70 sq.ft per person & 70% workspace occupancy on an average day

"Reimagine London" has increased our collaborative workspaces from 5% to over 20% and overall capacity by 17%

Property cost savings c.10-15% per annum

26% increase in satisfaction in offices that have been renovated

PwC offering/tool/ proposition

Business not buildings

We take a business not buildings approach. Your workplace is a physical manifestation of your culture and a critical enabler of your business strategy. Developing a robust, future-proofed property strategy requires an advisor that has the ability to bring a holistic understanding of the organisation itself. We'll support you by bringing the best of our thought leadership, access to and insight from our industry experts, whilst demonstrating that we 'walk the talk' with regard to our own property portfolio.

6 week case for change

Our approach will enable you to make an informed case for change including financial and non-financial benefits. Over 6 weeks we'll bring the best of PwC and rich data-driven insights that challenge your thinking, enabling you to set a compelling workplace vision alongside an actionable, practical plan to deliver it.

1. Project kick-off and mobilisation

- Liaise with your project team to agree roles, responsibilities and levels of engagement
- Identify wider key business stakeholders for future engagement
- Confirm your requirements and develop an understanding of your key drivers
- Data collection review

2. Confirm the baseline

- Collate a portfolio and workforce baseline and understand business operations and services
- Review existing leases and identify lease events
- Undertake a portfolio SWOT analysis and benchmark sites against agreed KPIs
- Define workforce personas and mobility targets to inform future space requirements
- Undertake anonymised staff travel to work analysis and mapping, overlaying findings with insights on talent pools and client demand data

3. Set the vision

- Showcase PwC property strategy and workplace.
- Run a visioning workshop with PwC experts and key business stakeholders
- Share insights of what other leading companies are doing on workplace strategy
- Agree a vision for the future real estate portfolio / workplace and the strategic estate objectives / design principles against which future property scenarios will be appraised

4. Develop scenarios

- Develop and assess scenarios to deliver the vision
- Identify gaps between the vision and your current property portfolio
- Set a 'challenger option' and propose taking an unconstrained 'bottom-up' approach starting with 0m2 of space, building up the requirement based on business need (Zero Based Real Estate Planning)
- Long list of scenarios will be produced and reduced to a shortlist

5. Evaluate scenarios

- Develop and populate a cash-flow model for each property option
- Develop indicative IFRS16 / Balance Sheet and Income Statement impact analysis of options
- Facilitate the non-financial evaluation of shortlisted options
- Compare option ranking and summarise the relative merits and rewards / risks of each option
- Agreement with key stakeholders on preferred scenario for implementation with robust rationale as to why the scenario if preferred over others

6. Reporting

- Produce a case for change document which sets out the key findings, summarises the vision, the qualitative and quantitative costs and benefits of the preferred scenario for implementation and the risks of execution.
- Hold a meeting with your senior stakeholders to present the paper and discuss next steps.
