

A postcard from PwC...

Name: Kate Boscari

Job Title: Tax Manager

Where I work: In the Tax Reporting & Strategy team, in London

I studied **A Level Maths** at School

How I use **Maths** in my work now:

- I use maths to calculate how much our clients need to pay in taxes
- I use maths to create spreadsheet to keep track of all the fees the client pays to PwC as I work with many countries and reconcile against what we budgeted for in our proposal/contract
- I use maths to create internal budget spreadsheets to understand how profitable a client is for the firm

My highlight of my job so far

- Going on international assignment to London to learn new skills - and staying there in the end!
- Managing a £12m+ contracts with a very large Swiss Pharma company and flying day trips to Basel
- Being able to travel across various cities in the UK as well as India, Switzerland, Ireland...
- Having the chance to get involved in lots of volunteering opportunities such as social mobility, schools, etc.

If I went back in time what piece of advice would I give my 17 year old self?

You might not know what you 'want' to do yet, so choose instead what you 'like' to do. Most importantly, understand what you are good at and what you find easy doing - is it reading? numbers? - that will really shape who you'll become one day. Follow your personal inclinations, always.
