

A postcard from PwC...

Name: Neha Puntambekar

Job Title: Senior Associate - Strategy & Data & Analytics G&HI

Where I work: Consulting, London Bridge

I studied **A Level Maths** at School

How I use **Maths** in my work now:

- I use maths to analyse data within hospitals and utilise tools such as Excel, Alteryx and Power BI to calculate key performance indicators and present results.
- I use maths to create teamwide trackers and tools in order for the team to operate efficiently and effectively, allowing more time for valuable client facing interactions
- Other uses include tracking budgets, forecasting revenue and developing client models

My highlight of my job so far

- My team winning the Consulting Innovation Advantage award and the PwC Spotlight award for Intelligent Digital in 2018
- Learning how to code in Python and using other cool analytical tools such as Alteryx
- Working on one of the largest health transformation projects in Saudi Arabia and getting to travel around the Middle East with colleagues

If I went back in time what piece of advice would I give my 17 year old self?

Please try not to get disheartened if you face any form of rejection and keep chasing your dreams... I got rejected from PwC 4 times before receiving my job offer and I am so pleased at where I am today, so please don't give up!
