

A postcard from PwC...

I studied **A Level Maths** at School

How I use **Maths** in my work now:

- I use maths to analyse data and draw conclusions. It taught me how to think logically and solve problems which are two key skills you need in any job

My highlight of my job so far

- Going on a trip to Calais to volunteer at a refugee centre. This was a great opportunity to give back to the international community and support people are less fortunate than us
- Travelling to different cities for training and client work

If I went back in time what piece of advice would I give my 17 year old self?

There are a lot of opportunities available for school leavers so do plenty of research and ask around. Don't feel pressured to study a course with a clear career path like nursing or dentistry, it's more important to study a subject you enjoy and are passionate about!

Name: Zainub Butt

Job Title: Technology Risk Associate

Where I work: In the Technology team within Risk Assurance, in Midlands
