

# A postcard from PwC...

**Name:** Calum McCabe

**Job Title:** Cybersecurity Associate

**Where I work:** Within the Core Advisory team in the Edinburgh Office

I studied **A Level Biology, Chemistry and Physics** at School

How I use **Science** in my work now:

- A key part of my role is communicating complex topics concisely and in a language tailored to my audience. Studying science at A-level has helped with this.
- Studying these subjects has also helped build analytical skills that I use each day to solve various problems.

**My highlight of my job so far**

- I started at PwC as a graduate 6 months ago and I'd say the biggest highlight so far has been the first month I spent training in London. I learnt so much there and met so many great people.
- Another has been collecting for a charity called The Hygiene Bank. It's incredibly rewarding knowing that all your effort is going to make a huge difference to those most in need.

**If I went back in time what piece of advice would I give my 17 year old self?**

*The job you will have later in life is not wholly determined by the subjects you take. It's never too late to pursue something you enjoy.*
