

A postcard from PwC...

Name: Chloe Carter

Job Title: Senior Associate Technology
Consultant

Where I work: Manchester, but sometimes
Liverpool, London and Warsaw (Poland)
too!

I studied **A Level Physics**
at School

How I use **Science** in my
work now:

- The short answer is, I don't... BUT there's lots of things that studying Physics made me better at:
- I'm a logical thinker, problem solver and can understand a breadth of technicalities in my projects - all really important qualities of a Delivery Manager
- I have to analyse information, spot trends and pay close attention to detail - these are all qualities of a physicist!

My highlight of my job so far

- Delivery managing a £1m+ project with a PwC team of 12 (UK and Poland-based)
- Being able to travel across various cities in the UK as well as New York, Paris and Warsaw with work! I'm also going to Nice in April
- Getting involved in 'extracurricular' activities such as schools and universities outreach, mentoring, etc.

If I went back in time what piece of advice would I give my 17 year old self?

Choose to pursue a career in what you love - people told me the same thing but I still didn't fully listen to it. I loved my degree in Mechanical Engineering, but the work I do now in Consulting is so much more 'me' than Engineering was, and I could've chosen literally any degree I liked to do the job I'm doing now.
