

A postcard from PwC...

Name: Sharf Rizvi

Job Title: Associate in FS Business Risk & Controls (Risk Assurance)

Where I work: More London Office, London

I studied **Maths** at School

How I use **Maths** in my work now:

- My current role doesn't necessarily require me to apply the maths skills I learn at school but allows me to bring an analytical approach to my way of working. It does help me to scan through large sets of information quickly, make sense of numbers and look for detail in everything I do to ensure precision.

My highlight of my job so far

- The highlight of my job so far is how quickly I've been given the responsibility to be independent and take charge in client work. I have had the opportunity to use my discretion and build meaningful relationships with clients.
- Volunteering and getting involved in giving back to the community has meant so much to me. I love getting involved in community service and the wide array of events and initiations have given me such a great platform to be able to serve.

If I went back in time what piece of advice would I give my 14 year old self?

Go for subjects that you're genuinely interested in as opposed to what everyone says you will need. We all bring different skill sets to work and at the end of the day, it's all about having fun and finding your passion in what really interests you!
